What you didn't know about Turmeric

Turmeric is a plant belonging to the Zingiberaceae genus, which has played an important role in the "Ayurveda" of ancient India. Modern studies have evaluated the high health value of curcumin in turmeric extract, and there have been more than 4,300 scientific studies in recent years.

Why do we need to Curcumin?

Curcumin, mainly extracted from the yellow pigment extracted from the rhizome of the plant "turmeric", is used as a source of spices, food, health care, life applications, etc., but curcumin only accounts for about 0.5%~6% of turmeric (low content)

Global scientists have accumulated up to 23,790 reports in the research of curcumin

In recent years, curcumin has become a widely used supplement in Europe, America and Japan.

Who needs Curcumin?

People with poor diet like processed food, busy lifestyle, busy work routine, sleep disorder, environmental pollution etc which result in weak physical strength, poor health need a good nutrition supplement and health maintenance.

Turmeric has been used for more than 6,000 years

According to records, turmeric has been used for more than 6,000 years. In many traditions in the past, it has a lot of positive effects on health. It can not only be eaten (like curry), but also used for health care. Among them, curcumin is regarded as the most beneficial polyphenolic compound in turmeric. It is the main herbal extract in Ayurveda (Indian traditional medicine system) and is recognized as the most valuable ingredient with health benefits.

Turmeric powder ≠ Curcumin

Generally, Curcumin has a low absorption rate and poor bioavailability which result in limited health benefits

The reason for this is that curcumin dissolves in fat, rather than in water, and as the digestive system is a rather watery environment, most of it just ends up being excreted by the body.

ABSORBABILITY
is the key

It is not how much you eat
But how much you can absorb

Made in Switzerland

姜皇素

· ROYAL CURCUMIN ·

The best choice for health care, help in the management of oxidative and inflammatory conditions, metabolic syndrome, arthritis, anxiety, and hyperlipidemia. It may also help in the management of exercise-induced inflammation and muscle soreness, thus enhancing recovery and subsequent performance in active people.

6 reasons why Royal Curcumin

1

Quality

Made in Switzerland

Royal Curcumin is made by Switzerland with high-tech extraction and breakthrough innovation technology

2

Absorption

Nano sized, good absorption, good water solubility

Overcome the key problem that curcumin is not easy to absorb, truly improve the absorption rate and bioavailability effectively

3

Metabolism

Improve physical fitness, physiological functions and metabolism

4

Nourishing

Improve energy, vitality and physical strength

5

Convenience

Just drip into drinking water to dilute

Simple, convenient, just drip it into drinking water to dilute as it is completely soluble in water

6

Assurance

No added preservatives, Suitable for vegan

Vegan

Premium

STC Test

ALS Test

Precautions:

- Keep out of reach of children • Not suitable for infants and young children
- This product is a plant concentrate, it is normal to have a color change or sediment
Recommendation: Store in the refrigerator after opening
- If you are pregnant, nursing, using medication or have other health concerns, please consult a professional before using this product
